Education

Kalinga Institute of Industrial Technology Bhubaneswar

2024 - 2028

Bachelor of Technology in Computer Science Engineering (CSE)

CGPA: 8.5

Delhi Public School Bokaro Steel City

Grad. 2024

Skills

Languages: Java, Python, C, Kotlin, JavaScript, SQL

Frontend Technologies:: HTML, CSS, JavaScript, React.js

Backend and Databases: Node.js, Express.js, MongoDB

UI / UX & Design Tools: Figma, Adobe Illustrator, Canva, Adobe Premiere Pro

Relevant Coursework: Data Structures & Algorithms (DSA), OOPs in Java (OOPJ), Operating Systems(OS), Database management system(DBMS).

Interpersonal: Public Speaking, Leadership, Team Management, Critical Thinking, Creative Thinking

Work Experience

SAIL - Steel Authority of India Limited | *Machine Learning Engineer Intern*

May 2026 - June 2026

- Built an Industrial AI platform using Machine Learning, Predictive Analytics, and Multi-Sensor Data Analysis to detect operational anomalies, generate machine health insights, and analyze shift-wise performance across 20+ exhauster parameters.

Fyndr | *Graphic Designer Intern*

March 2026 - May 2026

- Worked as a Graphic Design Intern at Fyndr, an AI powered platform for entrepreneurs where I created visual assets, social media creatives, and branding materials while collaborating with teams to maintain a clean and consistent design identity.

Last Minutes Deals | *Design Engineering Intern*

December 2025 - February 2026

- Worked as a UI/UX Design Engineering Intern, learning real-world design thinking under the mentorship of an ex-Swiggy Design Lead. I designed wireframes and prototypes, focused on user experience, and collaborated with developers to turn ideas into clean, usable interfaces.

Google Developer Group (GDG) KIIT | *UI/UX designer*

January 2026 - Present

- Designed UI/UX and developed responsive websites for GDG initiatives and events, focusing on accessibility, performance, and seamless user experience across devices while collaborating closely with developers.

Federation of Entrepreneurship Development (FED) KIIT | *Creative Senior Executive UI/UX*

April 2025 - Present

- Led UI/UX and graphic design initiatives for startup programs and events, creating digital assets, promotional creatives, and visual content to support entrepreneurial activities and campus startup engagement.

Projects

AI Driven Operational Anomaly Detection | *Python, Streamlit, Scikit-Learn, Pandas, Plotly* | [GitHub](#)

2026

- Developed an Industrial AI platform at SAIL Bokaro Steel Plant using 1000+ operational records and 20+ process parameters to detect anomalies, monitor machine health, and analyze exhauster performance.
- Built a Machine Learning-powered dashboard for anomaly detection, health scoring, and predictive maintenance insights, enabling data-driven operational monitoring.

SmartBite-Smart meal Planner App | *Android (Kotlin), Firebase, Jetpack Compose* | [GitHub](#)

2025

- Developed an AI-driven food recommendation app providing personalized, ingredient-based recipe suggestions and meal planning. Implemented Firebase authentication, smart notifications, and grocery inventory management with a modern Jetpack Compose UI.

ScanGuard – AI-Powered Scan & Detection System | *Python, PyTorch, OpenCV, Computer Vision* | [GitHub](#)

2025

- Developed a QR code scanning system using **computer vision** and **Python libraries** to analyze scanned data. Identified potentially unsafe or suspicious content while ensuring accurate and user-friendly scanning results.

ZeroTrace – Secure Data Wiping Solution SIH 2025 | *React.js, HTML, CSS, JavaScript, Figma* | In Progress

2025

- Designed the frontend interface for a secure data erasure application focused on usability and clarity. Created tamper-free wipe certification designs to support trust, verification, and compliance in IT asset recycling.

Personal Portfolio Website | *React.js, JavaScript, HTML5, CSS, Framer Motion, GSAP* | [Live Website](#)

2025

- Built a high-performance portfolio website using React.js and Vite with responsive design, interactive animations, and optimized rendering performance.
